BENEFITS OF O&M

Increase Efficiency
and Energy
Delivery

Decrease
Downtime Risk

Extend System
Lifetime

Maximise Return
of Investment

Ensure Safety and
Reduce Risk

Enhance
Appearance
and Image

Performance Monitoring

We provide daily remote monitoring of your system's operations to ensure it is constantly performing.

Preventative Checking

Our experts will carry out routine inspection and maintenance of all the operating hardware to ensure your system is always working in a safe condition.

Corrective Maintenance and Claim Management

We carry out swift corrective maintenance to issues that are detected as well as processing claims for any material defect under warranty.

PV Module Cleaning

We carry out scheduled cleaning of modules as well as vegetation control.

Predictive Maintenance

Integration of Artificial Intelligence of Things (AIoT) allows us to take proactive measures to maintain optimal performance.

Spare Part Support

We provide backup replacement support for your solar PV system to minimise system downtime.

Powertrack AIoT Solution

TRANSFORM ENERGY TO NEXT LEVEL WITH AIOT

Intelligent Business Decisions

Massive data can now be organised and processed easily using AI-based algorithms. Firm decisions can now be made based on big data.

Enhanced Operational Efficiency

Real-time screening and early-warning of abnormal activities are recorded, and alerts given. These increase effective labour input with guaranteed corresponding output.

Accurate Data Predictions

AIoT technology provides next-level predictions, predicting future outcomes prior to failures. This enables you to take proactive measures to ensure optimum efficiency.

Advanced Data Analytics

Enables powerful and sophisticated data analytics to be used to optimise the system. You can now generate higher performance based on data.

Smart Actions Recommendation

AIoT translates system performance issues into ideal actionable outcomes. This helps your organisation save money with support and maintenance of system equipment.

Seamless Customer Experiences

Understand your system's pattern, behaviour and challenges more precisely. Get a more personalised user experience with this advanced feature.

Residential Package

EXPERIENCE COMPREHENSIVE SOLAR PV MAINTENANCE

POWERTRACK

SERVICES	SOLAR PV SYSTEM SIZE	PRICE / YEAR
PACKAGE A		
I. Performance monitoring		
II. Preventative maintenance	4KW - 8KW	RM 850
III. Corrective maintenance and claim management	9KW - 12KW	RM 1,200
IV. Spare part support		
V. PV module cleaning (As needed)		
PACKAGE B		
I. Performance monitoring		
II. Preventative maintenance		
III. Corrective maintenance and claim management	4KW - 8KW	RM 1,000
IV. Spare part support		
V. PV module cleaning (As needed)	9KW - 12KW	RM 1,320
