

ENERGY EFFICIENCY

DRIVES SAVINGS AND SUSTAINABILITY

Energy efficiency (EE) refers to the practice of using lesser energy to accomplish an equivalent amount of work and output.

It involves the adoption of advanced technologies, streamlined processes, and sustainable practices that collectively improve the energy performance of your operations.

Saving up to **40%**

Fast **ROI** in **5 years**

Government grant up to **RM 100,000***

Increased property value

Improved **ESG** metrics

Maximise Savings with Energy Audit

LEVEL 1 General Evaluation

Expected Saving | **5%**

- Based on general energy consumption
- Provides initial insights, can be enhanced with systematic measures for substantial savings

LEVEL 2 Detailed Analysis

Expected Saving | **30%**

- Based on actual energy consumption
- Measured through technical and economical evaluation to achieve expected savings

LEVEL 3 Investment Grade Audit

Saving up to | **40%**

- Involve advanced and complex systems
- Provide detailed information for investment decisions and maximising savings potential

OUR SERVICES

- ✓ Energy Performance Contracting
- ✓ Design and Project Development
- ✓ System Optimisation and Automation
- ✓ Renewable Energy Integration
- ✓ Customise AIoT Monitoring & Reporting
- ✓ Operations and Maintenance
- ✓ Certifications and Regulatory Compliance

COMMERCIAL

- Comprehensive Energy Audit
- Energy Efficiency & Green Building Certifications
- Energy Monitoring System
- Energy Efficient Lighting
- Registered Electrical Energy Manager (REEM) Services
- Chiller Optimisation
- High Efficiency Motor

INDUSTRIAL

- Comprehensive Energy Audit
- Energy Efficiency & Green Building Certifications
- Energy Monitoring System
- Energy Efficient Lighting
- Registered Electrical Energy Manager (REEM) Services
- Chiller Optimisation
- High Efficiency Motor
- Thermal Management

FINANCING OPTIONS

When it comes to financing your energy solutions, we offer three flexible options tailored to suit your financial and operational needs:

Outright Purchase

CAPEX

Own your energy system upfront with CAPEX. Get full control and long-term savings.

Energy Performance Contract

ZERO CAPEX

Performance guarantee. We finance, install, and you pay based on savings, minimising risk, maximising efficiency.

Cooling-As-A-Service

PAY-PER-USE

Hassle-free Pay-Per-Use model. No upfront costs, pay for what you use.

WHY CHOOSE US?

Your Energy Efficiency Consultant

As a clean energy expert, Solarvest strategies a diverse array of energy efficient technologies to optimise energy savings, minimise wastage and maximise performance.

Malaysia No.1
Clean Energy Expert

>1,200MWp Project Track Record,
Serving 800+ Companies

Comprehensive Solutions,
Guaranteed Performance

Registered ESCO with
Energy Commission

Certified Professional
In-House Consultant

Financially Reliable
and Bankable

USE CASES

Commercial Sector

Industrial Sector

Public Sector

Transportation Sector

Agricultural Sector
